What is FOIA?

FOIA stands for **Freedom Of Information Act**. It allows anyone to request information from the Executive Branch agencies and departments (those agencies and departments that report to the President--[find them here](#)). FOIA does not apply to the Legislative Branch (U.S. Congress) nor the Judicial Branch (U.S. Courts).

[FOIA Resources](#), including the law itself (from the U.S. Department of Justice).

[Read the regulations governing FOIA](#). (from the Legal Information Institute at Cornell University Law School).

Is FOIA Right for My Project?

Before pursuing a FOIA request, do as much research as you can in the published record. Look at government reports, press releases, newspaper articles, etc. For most research projects, the published record can provide the information you may need. If you decide to do a FOIA request, examining the published reports will help you focus your request, or provide the necessary background information to better construct your request. Use the [government information guides](#) or contact a [government information librarian](#) for tips and advice on locating this information.

Questions?

Thank you!

More on Time

We will be unable to respond to your request within the FOIA's 20 day statutory time period as there are unusual circumstances which impact on our ability to quickly process your request. These unusual circumstances are: (a) the need to search for and collect records from a facility geographically separated from this Office and (b) the need for consultation with one or more other agencies or DoD components having a substantial interest in either the determination or the subject matter of the records. For these reasons, your request has been placed in our complex processing queue and will be worked in the order the request was received. Our current administrative workload is 1,633 open requests.

More on Cost

Per your request, you have set out that you are in the FOIA fee category of "Educational." The intended use of the information you are seeking is not clear from the request itself, and we encourage you to give us additional information or clarification. The school, UC Berkley, must show a use or purpose for the scholarly research. As well, to qualify as an educational requester, your request has to be authorized by and made under the auspices of a qualifying institution that operates a program or programs of scholarly research that is not being accomplished for commercial use. Scholarly research should further the goal of the institution, rather than an individual goal. Please note that records requested for the intention of fulfilling credit requirements are not considered to be sought for a scholarly purpose; furthermore, students gathering data for research papers do not ! qualify as educational requesters.

Would you please provide some indication, on official school letterhead, that the information you are seeking is to be used by University of California, Berkley, prior to close of business, March 4, 2015
